Professional Summary

Final-year B.Tech CS student focused on building scalable AI-first products with strong overlap between product thinking and technical execution. Built UrbanIQ, a complaint and document management platform that processed 4,000+ submissions across 4 months during deployment. Currently building CuteHelper, an AI desktop companion focused on guided learning and workflow assistance, while also working on Docmize, a university AI-integrated hospital management system. Strong background across frontend engineering, product architecture, PRDs, user psychology, and execution strategy. Looking for an Associate PM role where product intuition and technical depth create measurable leverage.

Experience

Product Builder — CuteHelper | Feb 2026 – Present

- Building an AI desktop companion focused on guided learning, voice-first interaction, and reducing workflow friction through persistent on-screen assistance.
- Designing mascot interaction systems in Rive and integrating Electron, Groq Whisper, and LLaMA-based workflows into the product architecture.
- Defining product philosophy, interaction patterns, retention loops, and long-term user experience strategy for learner-focused AI assistance.

Projects

Project Manager — UrbanIQ | Jan 2024 – Dec 2024

- Led end-to-end agile development of a campus complaint and document management platform processing 4,000+ submissions across departments in 4 months.
- Authored PRDs and translated 15+ stakeholder requirements into technical user stories, reducing developer onboarding time and improving sprint delivery speed by 25%.
- Enforced Definition of Done standards across UI/UX workflows, reducing post-release bug rates by 30%.

Lead Product Architect & Frontend Engineer — Docmize (University Project) | 2026 – Present

- Designing an AI-integrated hospital management system focused on appointment handling, patient workflow tracking, smart record organization, and operational efficiency.
- Responsible for frontend architecture, dashboard workflows, and AI-assisted UX flows for administrative and patient-side interactions.
- Collaborating on requirement mapping, workflow optimization, and modular system design for scalable healthcare management infrastructure.

Portfolio & Case Studies

- Genshin Impact PM Case Study — [View on Notion](#)
- Valorant PM Case Study — [View on Notion](#)

Core Skills

- Product: PRD Authoring, Roadmapping, GTM Strategy, User Story Mapping, KPI Tracking
- Execution: Agile, Scrum, Sprint Planning, Backlog Prioritization, Risk Mitigation
- Technical: React, Next.js, JavaScript, TypeScript, Python, REST APIs, GenAI Integration, Jira, Notion, Electron, Rive

Education

- I.K. Gujral Punjab Technical University — B.Tech, Computer Science & Engineering | Expected 2026
- Certifications: Google Project Management (Coursera, 2025) · Project Management Simulation (Forage, 2024) · AI/ML (Internshala, 2024)
